
APRIL-JUNE SALES REPORT 2026

**ULTIMATE
GENERAL
TRADING.**

SALES AND MARKETING DEPARTMENT

ULTIMATE GENERAL TRADING
Prepared by: KHADIJA NURU

EXECUTIVE SUMMARY

This report presents the sales performance of the Sales Department for April to June 2026. The department consists of four sales personnel, each assigned an individual quarterly sales target of TZS 75,000,000, resulting in a combined departmental target of TZS 300,000,000. During the reporting period, the Sales Department generated total sales of TZS 190,735,460, achieving 63.58% of the departmental target. Despite missing the target, the team maintained strong client engagement and continued to secure business opportunities.

INDIVIDUAL SALES PERFORMANCE

A comparative analysis between the first quarter (Q1) and second quarter (Q2) was conducted to assess individual sales performance trends and overall departmental progress. The analysis shows that the department's total sales increased from TZS 157,811,900 in Q1 to TZS 190,735,460 in Q2, representing an overall growth of 20.86%.

While some sales personnel recorded significant improvement in Q2, individual performance varied due to factors such as customer order cycles, order value, and market conditions.

Quarter-to-Quarter Performance Benchmark:

Sales Person	Q1 Sales (TZS)	Q2 Sales (TZS)	Variance (TZS)	Variance (%)	Trend
Khadija Nuru	91,282,440	43,667,380	(47,615,060)	-52.16%	Decrease
Marianne Shedafa	28,998,000	84,052,540	55,054,540	189.86%	Significant Increase
Irene Musomi	35,352,460	59,947,540	24,595,080	69.57%	Increase
Diana Dotto	2,179,000	3,068,000	889,000	40.80%	Increase
Total	157,811,900	190,735,460	32,923,560	20.86%	Increase

QUOTATION ANALYSIS

During the reporting period, the Sales Department submitted a total of 147 quotations, out of which 80 were successfully converted into confirmed orders, resulting in a quotation conversion rate of 54.42%. This indicates moderate conversion efficiency and highlights opportunities to further improve follow-up, pricing strategy, and customer engagement to increase sales closure rates.

SALES PERSON	QUOTATION SENT	ORDERS CONVERTED	CONVERSION RATE (%)
Marianne Shedafa	38	27	71.05%
Irene Musomi	47	15	31.91%
Khadija Nuru	58	36	62.07%
Diana Dotto	6	2	33.3%

The quotation analysis reflects varying strengths among team members in both conversion efficiency and sales value contribution. Khadija Nuru recorded the highest number of quotations submitted and converted, demonstrating strong follow-up and customer engagement. Marianne Shedafa achieved the highest conversion rate, showing strong efficiency in closing sales opportunities. Irene Musomi, despite a lower conversion rate, contributed significantly through high-value orders, while Diana Dotto showed growth potential with opportunities to improve lead generation and conversion.

TOP CLIENT CONTRIBUTION

Key repeat clients during this quarter included:

- State Mining Corporation — remained one of the major contributors, particularly through continued PPE and bulk orders.
- HESU Investment — continued as a strategic repeat client with consistent order frequency.
- Mapinga Premium Foods Limited — contributed through recurring supply orders during the quarter.
- Knauf Gypsum Tanzania Ltd — emerged as a promising new client during the quarter, with an order currently in transit. This presents potential for future business growth and long-term strategic partnership.

KEY ACHIEVEMENTS

- Retained major clients
- Increased engagement
- Secured repeat orders
- Improved coordination

CHALLENGES

- Delayed Customer Order Delivery — The department experienced delays in customer order fulfillment due to miscommunication and misunderstandings between internal teams, suppliers, and customers regarding order delivery timelines, and stock availability. These delays occasionally affected customer satisfaction, order completion efficiency, and overall service delivery.
- Delay in Customer Quotation Approval — Slow approval and decision-making by customers delayed order confirmations, affecting sales conversion and overall revenue growth.
- High Market Competition — The sales department faced intense competition from other suppliers within the PPE and general supplies market. Competitors offering lower prices, flexible payment terms, and faster delivery timelines created pricing pressure and reduced the company's ability to convert some potential orders into confirmed sales.

POTENTIAL REVENUE DELAYED TO NEXT QUARTER

During the reporting period, several customer orders with significant revenue potential, with amounting to a combined value of **TZS 73,561,200/=** were not completed within Q2 due to operational and coordination challenges. This consequently impacted the department's overall quarterly sales performance.

Diana Dotto – Knauf Gypsum Order

A promising order from Knauf Gypsum under Diana Dotto's portfolio, valued at **TZS 41,300,000/=** remained undelivered during the quarter due to delays and miscommunication with the supplier, resulting in late consignment arrival. Had the supply process proceeded as planned, the order could have been successfully delivered and recognized within Q2 sales.

Khadija Nuru – HESU Investment Order

An order under Khadija Nuru valued amount **TZS 21,653,000/=** experienced partial delivery challenges after the client raised concerns regarding the material quality used for the first batch of uniforms. As a result, production of the remaining quantity was temporarily halted pending client approval and clarification. Under normal circumstances, the full order would have been completed within the quarter.

Another major order valued at **TZS 10,608,200/=** experienced delays due to late provision of size specifications by the client. Although the Purchase Order (PO) was issued on time, delayed submission of critical sizing information affected production scheduling and postponed delivery beyond Second Quarter.

ACTION PLAN

- Increase Client Visits — Conduct more regular customer visits to strengthen relationships, identify new opportunities, and improve business engagement.
- Improve Follow-ups — Strengthen follow-up on quotations, pending orders, and customer feedback to increase conversion rates and improve service delivery.
- Strengthen Pricing Strategy — Improve pricing competitiveness through better supplier negotiations and market analysis while maintaining profitability.
- Maintain Adequate Stock — Ensure fast-moving PPE and general supply items remain available to minimize delays in order fulfillment.
- Enhance Customer Retention — Focus on maintaining strong relationships with existing clients to encourage repeat business and long-term partnerships.
- Strengthen KPI Monitoring and Performance Review — Conduct regular weekly or monthly reviews of individual sales performance against existing targets to identify gaps early and implement corrective actions promptly.
- Strengthen Supplier Coordination — Improve communication and follow-up with suppliers to ensure timely order processing, shipment tracking, and delivery to minimize supply delays.
- Enhance Pre-Production Quality Confirmation — Ensure product samples, material specifications, and client approvals are confirmed before mass production to reduce the risk of quality-related disputes and order interruptions.
- Improve Order Requirement Verification — Establish a stricter order confirmation process to ensure all critical customer requirements, including sizes, specifications, and delivery expectations, are received before production begins

CONCLUSION

The Sales Department recorded strong performance during the April–June 2026 period, achieving TZS 190,735,460, equivalent to 63.58% of the quarterly target. Despite challenges such as market competition, delayed quotation approvals, and occasional delivery delays, the team maintained good customer relationships and secured valuable business. With improved communication, stronger follow-up, and continued teamwork, the department is well-positioned to achieve better results in the next quarter
